Subject: Gorge Dam - Containment Drum Next Steps
Attachments: IMG-4320.JPG

Hi Mary Beth and Chris – We had an internal discussion this afternoon about next steps for the containment drum holding the smaller container of an unknown substance which appears to be grease. We've got three options for you to consider and we'd like to discuss these tomorrow morning during our call.

Option 1 – GLNPO requests the City of Akron manage the disposal of the drum. Based on Heather Ullinger's response to date regarding the drum, it is not likely CoA would agree to this option.

Option 2 - GLNPO contacts the closest USEPA Environmental Response Team and requests them to visit the site and remove/dispose of the drum. This may be the quickest and most cost effective way to have the drum removed from the site quickly. One of the main concerns is the drum is in an unsecured area and the quicker the drum can be moved offsite the better.

Option 3 – GLNPO authorizes Jacobs to manage the disposal of the drum using a waste disposal subcontractor. We're working on an estimated waste disposal subcontractor cost and hope to have that available before the call tomorrow morning. We could get the subcontract set up in time to have the field staff conducting the geotech drilling coordinate with the waste disposal subcontractor.

We're looking forward to talking with you tomorrow.

Cheers!

Bill

Jacobs Challenging today.
Reinventing tomorrow.
